

**Use Case ID & Name:** UC-02 Book Counseling Session

**Primary Actor:** Corporate Employee

**Secondary Actor:** Licensed Therapist

**Description:** Allows an authenticated employee to search for available therapists, select a convenient time slot, and securely reserve an anonymous counseling session using a pseudo-ID.

**Preconditions:**

1. The Corporate Employee is logged into the Corporate Mental Wellness & Counseling Platform.
2. The system has initialized an active session tied to the user's account.

**Postconditions:**

1. The selected appointment time slot is reserved and locked on the therapist's calendar.
2. The booking record is saved with an anonymized pseudo-ID, keeping corporate PII completely hidden.
3. Confirmation details are generated for both the employee and therapist.

**Main Success Scenario:**

1. Corporate Employee selects the "Book Counseling Session" option on the wellness dashboard.
2. System displays a filtered list of available licensed therapists along with open calendar time slots converted to the employee's local timezone.
3. Corporate Employee selects a preferred therapist and an available time slot.
4. System executes **UC-03: Generate Anonymized Pseudo-ID** to generate or fetch a secure pseudo-ID for this booking interaction.
5. System verifies that the requested time slot is still open in real-time.
6. System creates the appointment record, attaching only the pseudo-ID and clinical booking metadata.
7. System updates the therapist's calendar, showing the slot as reserved for the pseudo-ID.
8. System displays a confirmation screen to the employee with the appointment details and calendar invite link.
9. Use case ends successfully.

#### **Alternate Flow:**

- **5a. Time Slot Concurrently Booked / Unavailable**

- **5a1.** System detects that another user reserved the selected time slot during step 3.
- **5a2.** System notifies the employee with an error message: *"The selected time slot is no longer available."*
- **5a3.** System refreshes the therapist's availability schedule in real-time.
- **5a4.** Employee selects a new open time slot, and the process resumes at Step 4.
